# **CYBER Release 1.44.12.0 DD Eligibility Enhancements & CSA Maintenance**

**TABLE OF CONTENTS**

**1 RELEASE INFORMATION..... 3**

**2 OVERVIEW..... 3**

**3 REFERENCES..... 3**

**4 NEW FEATURES ..... 3**

**4.1 DD Eligibility Enhancements..... 3**

**4.2 CSA Maintenance Enhancements..... 3**

**5 DEFECT FIXES..... 4**

**6 CHANGE LOG..... 6**

## 1 Release Information

	Item	Description
A)	Initial Draft Date	May 30, 2019
B)	Revised/Final Date	June 20, 2019
C)	UAT Release Date	June 13, 2019
D)	Production Release Date	June 20, 2019
E)	Application	CYBER
F)	Version	CYBER 1.44.12.0

## 2 Overview

This document provides the information related to the implementation of the CYBER Release 1.44.12.0 - DD Eligibility Enhancements and CSA Maintenance.

## 4 New Features

### 4.1 DD Eligibility Enhancements

The following changes have been made to CYBER regarding CSA Operations in deference to DD ELGIBILITY:

- The system will have a new security group “CSADDELIGIBLE” which will be administered by CSAADM users.
- The system will allow CSA users with the security group CSADDELIGIBLE to make an expired application active.
- The system will allow the CSA users with the assigned security group CSADDELIGIBLE to recall a DD Eligibility Review form that is in “FWD to CSOC” status. (For instance, when the form was submitted to CSOC in error).

### 4.2 CSA Maintenance Enhancements

The following changes have been made to CYBER Maintenance items in this release:

- CSA users will not be able to modify the Decision drop down value to Approved, Denied, Suspended, or Suspension Requested when the Authorization was sent to DXC and the Decision drop down is set to “Provider Action Required”.
- The system will modify the Approval tab of the 3560 Application for CSA Users.
- The Crisis Tracking Form will be modified.
- The Intermediate Unit (IU) clinical criteria within the Intensity of Service Determination section of the UM Service Request Form (UMSR) will be updated.

## 5 Defect Fixes

The following items were fixed and have been included in this release.

FogBugz #/ Work Order #	Description
<p>WO 237209 FB 26231</p>	<p>ISSUE: Change label on button “Facesheet” to “Face Sheet” in the Add/Edit Support Member Screen.</p> <p>RESOLUTION: Changed label on Same as Face Sheet button on Add/Edit member pop up window. Button previously read "Same as Facesheet", was changed to "Same as Face Sheet"</p>
<p>WO 257942 FB 26757</p>	<p>ISSUE: MEDICAID Authorizations are appearing in the WP link for NON MED AUTHORIZATIONS.</p> <p>RESOLUTION: Removed filtering of AUTHORIZATIONS for all agency types for NON-MED with the exception of IIC. IIC agencies are the only provider type with a separate WP link section for NON MED Authorizations.</p>
<p>WO 262969 FB 27056</p>	<p>ISSUE: In testing a related bug, QA found a method which allows an OOH user to submit a JCR directly to the CSA after first submitting the plan to the youth's CMO as designed.</p> <p>RESOLUTION: Code was added to ensure the SUBMIT button is disabled prior to the plan fully loading. This combats slower networks which could show the disabled button as enabled long enough to use.</p>
<p>WO 283877/284649 FB 28748</p>	<p>ISSUE: Users cannot add Responsible Persons to the Matrix in IIC_2 treatment plans (this also occurs in the IIH Treatment Plan). When the Responsible Persons tab is opened, "LookupZipCityState_ID" is displayed in the grid. When the Add New screen is filled out and Accept is clicked, the new entry does not get added to the grid.</p> <p>RESOLUTION: A field which needed to be added to the affected stored procedure - as a result of some further-reaching changes to the way the Zip Code data was being handled in other areas of CYBER such as Supports. The added field corrected the reported behavior.</p>
<p>WO 284304 FB 28761</p>	<p>ISSUE: The CSA is having intermittent issues with the SECONDARY SPECIFIERS becoming enabled in the AHH Youth Checklist.</p> <p>RESOLUTION: The code was being executed asynchronously. The sequence of execution to enable and disable the user interface controls were not properly considered.</p>

FogBugz #/ Work Order #	Description
<p>WO 284883 FB 28764</p>	<p>ISSUE: Family Portal user cannot create a 2019 Camp Application; gets validation stating, <i>“An application has already been generated”</i> when no 2019 application exists.</p> <p>RESOLUTION: The status, <i>“Expired”</i> had been attached to the Camp Applications in error. This status is reserved for the DD Eligibility application. The correct status, <i>“App Expired”</i> has since been reinstated for use with the Camp Applications.</p>
<p>WO 284912 FB 28768</p>	<p>ISSUE: FSO users receiving, <i>“Error: Subreport cannot be shown”</i> when printing the DASHBOARD view of a youth record.</p> <p>RESOLUTION: This was another area affected by the Zip Code changes recently made to the system. The addition of new code corrected the issue.</p>
<p>WO 286025 FB 28786</p>	<p>ISSUE: CSA users running a search within the ADD NEW CHILD screen/process are getting <i>“potential matches”</i> (duplicate) addresses which match the actual street address of the new youth to be added. When the user visits the youth record of one of these potential duplicates, the user finds the address to be completely different than what was displayed in the search results grid.</p> <p>RESOLUTION: The incorrect address occurring in add new child screen is something has to do with the back end database stored procedure not properly joining tables to get the correct zip code information. This is due to us creating a zip code table to handle unique zip code, county, city combination for a zip code. The resolution is by fixing the stored procedure to query the correct data for the address information.</p>
<p>WO 286834/287679 FB 28787</p>	<p>ISSUE: The new Race and Ethnicity table (tblMemberLookup) is not being used to pull Race and Ethnicity for doc and reports. The old tables/columns are being used. As a result, the options appearing in the DEMOGRAPHICS section of a Youth Record may not match the options displayed in the Treatment Plans’ version of the Demographics.</p> <p>RESOLUTION: The new Race and Ethnicity table (tblMemberLookup) was not being used to pull Race and Ethnicity for doc and reports. The linkage points in DocDefDemo_GetDemo and usp_MemberGet scripts were updated to the correct tables.</p>
<p>WO 287447 FB 28790</p>	<p>ISSUE: The grid for ADDITIONAL ADDRESSES on the Demographics tab of a youth record cannot be sorted properly using the Start Date header.</p>

FogBugz #/ Work Order #	Description
	<p>RESOLUTION: The data received from the backend is in a string format. When sorting by string, the date won't be sorted correctly in the grid. To handle it, string date column is being wrapped in a date field to be sorted correctly in the front end. Additionally, any default sorting is selected properly in the back end.</p>
<p>WO 289830 FB 28825</p>	<p>ISSUE: FSS users are no longer able to access PROVIDER DETAILS as the button is disabled for use.</p> <p>RESOLUTION: We recently made a change in the 1.44.11.0 IU release to check for [Provider Detail] security access. This change affects security access for many other login types that were not using the security check in the past. All other login types remain the same functionality prior to IU release.</p>
<p>WO 289743 FB 28827</p>	<p>ISSUE: FSO user reported they have a youth on their Welcome Page "Youth Access Prog Notes" Aging Report who is no longer opened to their agency. When Tracking ends the youth should no longer appear on this Aging Report.</p> <p>RESOLUTION: All of the youth showing "Overdue" are no longer open to this agency. Therefore, these records should not appear on [Youth Access Progress Notes - Aging Report]. To fix this, the back end stored procedure that returns these records were filtered out by the progress notes that are "Overdue". The stored procedure name is called "usp_WP_ContAccProgNote".</p>
<p>WO 283115 FB 28828</p>	<p>ISSUE: This issue involves the IIH TRACKING side end dates not updating as expected in concert with the EPISODES.</p> <p>RESOLUTION: The IIH tracking elements are updating as expected and no longer creating split Episodes of Care. The fix includes corresponding data cleanup.</p>

## 6 Change Log

	Change Log	Detail
<p>V 1.0</p>	<p>Submitted to CSOC</p>	<p>6/20/19</p>
