1 Release Information

	Item	Description
A)	Initial Draft Date	4/3/2019
B)	Revised/Final Date	4/17/2019
C)	UAT Release Date	4/11/2019
D)	Production Release Date	4/18/2019
E)	Application	CYBER
F)	Version	CYBER 1.44.11.0

2 Overview

This document provides the information related to the implementation of the CYBER Release 1.44.11.0 Intermediate Inpatient Unit.

The following are the items that will be incorporated into the CYBER system and the PerformCare clinical process for the Intermediate Unit provider type.

- There will be new Intermediate Unit (IU) Agency type with new Security roles.
- CSA Security Administrator users will be able to create/edit ID's for IU users.
- IU Security Administrator users will be able to create/ edit/ deactivate ID's for other IU users that are active in their program.
- CSA and IU Security Administrator users will be able to associate Levels, Plan Levels.
- There will be a new Welcome Page for IU Users.
- IU users will have access to the System Functions button functionality.
- IU Users will be able to view and upload documents to a youth's record.
- There will be a new Progress Note type for IU.
- There will be two Intermediate Unit Providers Trinitas Hospital and Inspira Hospital
- CSA will be able to create authorizations for the service code CSC03 for IU providers.
- The system will create the Tracking Element and Episode of Care for service code CSC03 on the Security Tab and on the Episodes tab.
- The Utilization Management Service Request Form will be updated with the option to select the Intermediate Unit.
- The system will display a flag on the Dashboard when a youth is open to an IU program.

4 Defect Fixes

The following items were fixed and have been included in this release.

Release Notes CYBER Release 1.44.11.0 Intermediate Inpatient Unit

FogBugz #/ Work Order #	Description
<p>FB 26939 WO 260663/260925</p>	<p>ISSUE: FBA and BSP are non-editable when returned by the CSA for some users.</p> <p>RESOLUTION: The cause was determined to be due to trailing whitespace in the forming of the reporting userid. A change was made to the DocDataSave stored procedure to trim any leading and/or trailing whitespace tied to a userid.</p>
<p>FB 27193 WO 265905/270223</p>	<p>ISSUE: In the SUPPORTS tab, when users add a new support and use the "Same As Face Sheet" option to populate the CITY, STATE, and ZIP CODE, this data was not retained using the "Accept" button.</p> <p>RESOLUTION: A code change was made to add the zip city county lookup ID to the table, "MemberEXT3" when a Zip Code is selected via the SAME AS FACE SHEET option or by manual entry by the user.</p>
<p>FB 27608 WO 276899</p>	<p>ISSUE: AHH Youth Checklist displays intermittently for OAS users.</p> <p>RESOLUTION: A performance tuning was implemented on the affected stored procedure which allows the AHH Youth Checklist to load as expected for all users with access to this checklist.</p>
<p>FB 27638 WO 277719</p>	<p>ISSUE: The CSA is getting "Error Updating Admission ...-1" when attempting to create a new SABOOH episode based off the open tracking for the SABOOH.</p> <p>RESOLUTION: When creating a new admit a -1 ADF (admit/discharge ID) is sent to the stored procedure to indicate that a new admit must be created. This -1 ADF parameter was being interpreted as a failure. A code change now handles this process by attaching to the current admission (Episode).</p>
<p>FB 26847 WO 259003</p>	<p>ISSUE: Portal users are able to submit a new DD Eligibility Application when the youth has already been deemed as DD Eligible.</p> <p>RESOLUTION: A stop was placed into the code to prohibit the creation of a new DD Eligibility application when "DD-000" tracking is active for the youth.</p>
<p>FB 26650 WO 254641/255888</p>	<p>ISSUE: An approved Annex A Admin Change addendum does not updated the agency address in Provider Details in cases where the Master CIMID and SITE CIMID are the same value.</p> <p>RESOLUTION: The stored procedure, "usp_AnnexABatchActivate" now updates the Zip Code ID in the CYBER table "xvt_CIMEntityExtension".</p>
<p>FB 26761 WO 244694</p>	<p>ISSUE: Using the ASSIGN button under FILTERED PLANS, if the CSA assigns several CON assessments to themselves or other CSA users, eventually the ASSIGNED TO menu at the top right of Plan Approval "loses" the ALL USERS and UNASSIGNED USERS options in the ASSIGNED TO drop-down and the default becomes the first username in the menu.</p>

Release Notes CYBER Release 1.44.11.0 Intermediate Inpatient Unit

FogBugz #/ Work Order #	Description
	RESOLUTION: A change was made to the stored procedure to increase response time when selecting multiple plans or assessments for assignment.
<p>FB 27501 WO 272814</p>	<p>ISSUE: When creating a new Strengths and Needs Assessment (SNA), the module "OOH" is populated though the youth is not admitted to any Out of Home Treatment facility.</p> <p>RESOLUTION: The specific scenario has the youth open to a SAB Outpatient service which was being treated as SABOOH in terms of classification of the provider. A change was made to the stored procedure, "usp_PlanAgencyType" to filter SAB agencies out and keep SABOOH agencies in the algorithm.</p>
<p>FB 27502 WO 273134</p>	<p>ISSUE: CMOADM users cannot use the DEACTIVATED checkbox option as this option is disabled.</p> <p>RESOLUTION: A coding change was made to allow full ADM access again for the CMOADM users. No other ADMIN user types are affected.</p>
<p>FB 27522 WO 271233</p>	<p>ISSUE: User can assign and reactivate an Approved Treatment Plan.</p> <p>RESOLUTION: A combination of user-side network lag and a slowness in the disabling of the Action buttons (SAVE, SUBMIT, etc) allowed the user to click the SAVE button as the plan loaded. As a result, the plan was reverted to an IN-PROGRESS status from the previous APPROVED status. A performance change was made to the governing stored procedure to render these action buttons as disabled during the loading of the plans/assessments.</p>
<p>FB 27556 WO 275145</p>	<p>ISSUE: User with access to the Dashboard in CYBER are getting the message, "Error: Subreport cannot be shown" when attempting to print the Dashboard.</p> <p>RESOLUTION: A reference to a drop table command was filtered in the stored procedure causing a table comparison mismatch in the print. This filter has been removed.</p>
<p>FB 27657 WO 278378</p>	<p>ISSUE: Expired CAMP application layer status is EXPIRED, but Family Portal user sees only Approved Request options (nested in the Camp Application).</p> <p>RESOLUTION: The stored procedure, "usp_Doc_Camp_Header" has been updated to perform status changes as, "usp_Doc_Camp_HeaderWP" performs.</p>
<p>FB 27665 WO 279325</p>	<p>ISSUE: A 2018 CAMP application which has all nested Camp Requests approved shows as "PENDING" in CYBER for the CSA. This pending status should be displayed as "Final Determination Made".</p> <p>RESOLUTION: This is a similar change as listed above in FB 27657, but is not an exact duplicate as the statuses are different and are processed in a slightly different manner. The stored procedure, "usp_Doc_Camp_Header" has been</p>

Release Notes CYBER Release 1.44.11.0 Intermediate Inpatient Unit

FogBugz #/ Work Order #	Description
	updated to perform status changes as, "usp_Doc_Camp_HeaderWP" performs. This also involved a manual status correction on the specific 2018 application.
FB 27667 WO 278857	ISSUE: TISP returned by the CSA are not reopening CMO tracking as expected. RESOLUTION: A change was made to the controlling stored procedure, "usp_TreatmentPlan_CloseTERReverse" to utilize Discharge Date in the plan in conjunction with the "TEMaxEndDate" value.
FB 27701 WO 280557	ISSUE: In Youthlink, the "Provider Map" never loads for some OOH users with lower bandwidth conditions. RESOLUTION: The call to component, "Google APT " has been disabled so providers with existing GEO data* (latitude and longitude) will display on the map in accordance with loading standards. *For providers that don't have GEO data, a manual update the GEO data in the database. A long term solution is being discussed in recent Advisory meetings (JAD).
FB 27713 WO 280249	ISSUE: FSS – OVR is barring "bucket" services from being admitted when OVER is actively open to a youth. RESOLUTION: OVR services have been isolated from the "bucket" services rule and can be active in tandem with bucket service admissions.
FB 26646 WO 255430	ISSUE: IIC_2/BA_2 Treatment Plans are not generating progress notes on auto-routed approvals. RESOLUTION: There was a bug which occurred when the data in the Security tab is refreshed which was blocking the progress note creation process. This stored procedure has been corrected.
FB 27518 WO 271810/281661	ISSUE: When submitting the MRSS-IniICP Treatment Plans, the plan is auto-routed/auto-approved and generates a CSASC Progress Note Type similar to "MRSS submitted on [date] [time] was marked approved and requested services authorized." RESOLUTION: A correction was made to the refresh process in a stored procedure of the CYBER Security tab which was blocking the progress note generation.
FB 27728 WO 281703	ISSUE: When the CSA is looking at CAMP REQUESTS while viewing a specific app by YEAR ("All" is the default) the Camp Requests appears as duplicated. RESOLUTION: A correction was made to the stored procedure, Doc_Camp_Header" which was showing attached requests in the applications as duplicated.

FogBugz #/ Work Order #	Description
FB 27679 WO 274067	<p>ISSUE: FSS OVR authorizations generate for 6 units regardless of the units selected at admission. Users would like the actual requested units at admit to match the created authorization units.</p> <p>RESOLUTION: The system now bases the created authorization based on the unit value selected at admit (1-6) instead of the automatic issuance of 6 units which was based on the Service Type (OVR).</p>

5 Enhancements

The following items were implemented and have been included in this release.

FB 27730 WO 264799/266124	<p>REQUEST: The system will update the Allow Communications to No for the CSA preferred method of contact when the user chooses to opt out from the texting campaign.</p> <p>CHANGE: The data for these users opting out of the campaign has been loaded into the system to update the "Allow Communications" field in the CSA Preferred Method of Contact to, "No".</p>
