## 2 Overview

This document provides the information related to the implementation of the CYBER version 1.44.3.0. The State of New Jersey, Department of Children and Families, Children’s System of Care (CSOC) has requested to make changes in CYBER to identify and update Premium Support Program (PSP) records as not valid for CSOC services. The Premium Support Program is identified by Special Program Codes (SPC) 50, 51, 52, 53, 54, 55, 56, 57, 58, and 59 and are considered TPL as the family has private insurance, but the premium is paid by Medicaid. The Insurance tab in CYBER displays third party liability and other insurance information gathered in CYBER and extracted from OIT and Molina. For this release CYBER will display records with the Premium Support Program to show as not valid for CSOC services.

The Premium Support Program release will identify PSP Medicaid number, flag it as not valid for CSOC services, and modify description and type information on the Insurance and Eligibility Tabs within the youth record.

This includes:

- Identifying Premium Support Program Medicaid Numbers by the associated SPC codes of 50, 51, 52, 53, 54, 55, 56, 57, 58, and 59 and flag it as not valid for CSOC services.
- Modifying the type and description under Insurance tab.
- Modifying the Status Description under Eligibility tab.
- Modifying the SPC description under the Special Program Code grid in Eligibility tab.
- The Active TPL field on the Dashboard will be updated to display “Yes” if there is an active (no end date or future end dated) PSP record.
